### GENERAL OFFICE ACTION

**1.0** A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed on 8/27/04 in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission, concurrently filed, has been entered.

**1.** This office action is in response to Applicants' **Amendment** of 8/27/04.

**1.1** **Claims 1 and 10** are amended. **Claims 1-18** remain pending.

**1.2** The rejections of record are maintained in response to Applicants' amendment.

### Response to Arguments

**1.3** Applicants' arguments/amendment of 8/25/04 have been fully considered but are not persuasive.

### REMARKS

**2.0** In response to independent **Claims 1 and 10**, Applicants argue, on page 6 last para. - page 7 1st para., that the prior art of record does not teach the claims as amended, i.e., the claimed invention is performed via '*identification of the wireless communication device*' and via '*using the number of wireless communication devices to determine if retransmission is necessary.*'

**Examiner disagrees and notes that such is not recited as limitations as argued in any of Claims 1 and 10.** 'Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).'

Regarding Applicants' arguments about the '*identification of the wireless communication device*,' **Examiner** notes that **GONNO's** broadcast system, during a training session, knows how

Art Unit: 2133

many receivers are 'on board,' and has means to uniquely identify frames as they are being broadcast. And equivalently, when a frame is lost, there is no ambiguity as to what frame is to be rebroadcast since all frames are uniquely identified. Thus, plural requests for retransmission of a same frame from plural receivers will be treated as a request to retransmit only that unique frame identified as lost.

Therefore, absent the positive explicit recitation of above steps in claims at bar, said claims are not distinguished over the prior art of record.
